

Verti-Block

High-End Residential Build Case Study

The Brief

With 30 metres of retaining walls required onsite, the client required a solution that not only offered structural strength and long-term durability, but also matched the visual appeal of the Cotswold stone which is common to the local area and used throughout the property.

The Solution

Verti-Block was chosen for its combination of performance and aesthetics:

- Natural stone-style finish for seamless visual integration
- Hollow-core, interlocking system for rapid installation
- High strength with less machinery and manpower required
- Durable alternative to natural stone with minimal maintenance
- Supported by Naylor Concrete's expert team with site visits, design drawings and installation guidance

Project Details

Location: Cheltenham, Gloucester

Product: 30m of the Verti-Block retaining wall system

Further information available on request.

Outcome

Using Verti-Block has enabled the creation of low maintenance, durable walls which match the stonework used throughout the rest of the property.

Requiring the use of just one machine and two workmen, the product was also extremely quick and easy to install when compared with other products or materials, and throughout the process, we had the peace-of-mind which comes from having a complete support service from the manufacturer and supplier.
